

Story UFC-290: Recent Transactions List

The following document will go over the design of the recent transactions list, as outlined in Story ticket UFC-290.

Acceptance Criteria

For reference, the following are the acceptance criteria for this ticket:

- I want to see the last 5 transactions for the selected date range on my dashboard.
- The header of this transactions list should be 'Last 5 Transactions for Period', instead of 'Most Recent Transactions', since the later could be construed as being for 'All Time', instead of just the selected date range.

Design Brainstorming

I keep going back and forth on *what* to show in this 'recent transactions' list, but I think I've finally settled on just 'last 5 in date period', since it's the most precise. The original header of 'Most Recent Transactions' left too much ambiguity.

Now, what should we do about the empty state? As far as I can tell, we have 2 options:

- i. Leave it as is, with the 'Add Transaction' button and message.
- ii. Change it so that it just says "No transactions during this period".

Honestly, 2 would be more work (and less functionality), so let's just stick with 1.

In terms of layout, the list should be on the right side of the Dashboard grid. Whether it should take 1 row or 2 depends on how much height 5 transactions (all with separate dates) takes up; I have a feeling it'll end up taking both rows.

On mobile, the list should be shown as the last item (below both graphs).

As for whether or not the actions should be removed from the list items, I think we should just leave them, 1. because it's less work and 2. because it doesn't really harm anything to have them there.

Component Breakdown

Atoms

- N/A

Molecules

- N/A

Organisms

- RecentTransactionsList (take TransactionsList, add the header, and connect it)

Scenes

- [modification] Dashboard (add RecentTransactionsList)

Tasks

- Build it.
