

Story UFC-186: Account Editing

The following document will go over the design of account editing, as outlined in Story ticket UFC-186.

Acceptance Criteria

For reference, the following are the acceptance criteria for this ticket:

- I can click a button next to an account to bring up the AccountForm but pre-populated with the account's information for editing.
- I can save any edits I make to an account.

Design Brainstorming

We actually did the bulk of the brainstorming for editing in the creation story (UFC-185), but it's no longer relevant because we changed how the form is shown (by a URL instead of from a flag in the store).

I think switching to URLs greatly helps out the editing use case because we no longer have to worry about resetting internal state hackily whenever the editing account changes -- it just changes automatically based on the URL. So there shouldn't be any great obstacles in getting editing working. And because I said that, *jinxed!*

Component Breakdown

Atoms

- N/A

Molecules

- N/A

Organisms

- [modification] AccountForm (connect it to grab the account from the url)

Scenes

- N/A

Tasks

- Modify the AccountForm to work with editing.
