

## Story UFC-305: Demo Account

The following document will go over the design of the no-account demo account, as outlined in Story ticket UFC-305.

### Acceptance Criteria

For reference, this ticket primarily addresses acceptance criteria 17 of [Epic UFC-145: Offline First](#).

### Design Brainstorming

A significant portion of the design brainstorming for this story happened in [Phase 4: Going Fully Offline](#). See the "Demo Account" section.

For reference, here's a list of tasks that we'll need to complete:

- Add a button on the Welcome Step (the second one in no-account mode) to put the user into demo mode.
  - The button should allow the user to skip the onboarding process and put them straight into the app.
  - It should generate a set of somewhat realistic data -- accounts and transactions, where the transaction dates are randomly generated to be extending into the past, relative the current date, and all strings (i.e. names, descriptions, etc) are somewhat believable, if not obviously fake.
- Create a saga that skips the onboarding and generates the dummy data.

### Tasks

- Build the demo mode.
