Checklists

Here's what we're gonna need:

Desktop

- Need an account deletion modal.

- Need a *user* account deletion modal.

Mobile

- Need an account deletion modal.

- Need a *user* account deletion modal.

Brainstorming

- Oh man, I really like those Tailwind UI modals.

- I think combining those with the line of color across the top will look real nice.

- The only thing I don't particularly care for on the Tailwind UI modals is the shadows on the buttons giving depth to the Cancel button (or that the Cancel button is even a full button).

- But I do really like how the mobile version re-flows to a vertical layout.

    - Decided against the vertical layout because the modals still looked good with the regular layout, just with smaller text and less whitespace.

    - Might re-evaluate this if we ever have modals that have lots more text, as the current ones are quite light on text.
